

Fibromyalgia

- ✓ MAC has conducted 5 studies in fibromyalgia over the past 5 years.
- ✓ We provide in-house, unique scientific solutions to accurately measure the efficacy of pain studies. These solutions are led by industry experts and include Pain Assessments and Human Models of Disease.
- ✓ These models cover several therapeutic indications including pain and inflammation, ensuring optimal assessment selections and support throughout the study.

Phase IIa Case Study

MAC recruitment performance at study close

800 initial contacts

Randomisation by site

MAC outperformed all other sites , randomising 67% of the UK study population
